

OUR PRODUCTS

Boland International has access to products from the entire Trane portfolio of Global Factories. This includes Trane's open protocol Building Automation System.

Arctic Chiller Group's product portfolio is installed at a number of US Federal Government facilities around the world, in a variety of climates and applications. Trane's purchase of Arctic enhances product engineering support and provides a linkage to Trane's global network of service offices making Arctic an ideal solution to specialized cooling and heating needs.

Mitsubishi and the Joint Venture with Trane have aligned with Boland International to provide 50 Hz Variable Refrigerant Flow (VRF) and Mini Split Solutions for OCONUS US Federal Government Installations. Please contact our team for cut sheets, information, and quotes on our 50 Hz offering.
